

Instructions, care & safety notices

Pinwheels

Congratulations!

With the purchase of a Mystim toy, you have opted for a quality product „made in Germany“. You should read the following useful instructions carefully prior to using the toy for the first time so that you will be able to enjoy it for a long time.

We wish you lots of pleasure!
Your Mystim team

Electrostimulation and eroticism

Stimulating current is becoming more and more popular, because this kind of stimulation is incredibly fascinating and produces intense sensations.

Electric stimulation is harmless as long as you apply it with high-quality products and care.

You should always keep some things in mind when using e-stim:

- Persons with electronic or metal implants (e.g. pacemakers) may not use stimulating current without consulting their physician first. The same applies for persons who suffer from epilepsy, heart defects or arrhythmia.
- Never let electrostimulation flow through your heart or brain. Never stimulate the larynx or throat region. Muscle spasms in this region may cause

suffocation.

- Stick to the „Never-above-waistline-rule“!
- Electrostimulation devices may not be used around explosive or inflammable materials.
- Electrostimulation may not be applied during pregnancy.
- Electrostimulation may only be applied on healthy skin.
- Keep away from children.
- Only use original mystim accessories.

Application

Our Spiny Spencers are often misjudged as pasta wheels, although we have to admit that they are perfectly suitable to treat noodles they are mainly up to something else: They are monopolar pinwheels which means you have to use a self-adhesive electrode or e.g. one of our Rodeo Robin penile loops in order to create the second pole for the current to travel.

It's totally up to you if you're using them like soft wheels of fortune or if you let them bring you on the spot in no time at all.

Cleaning and maintenance

Our Spencers are made from steel and easily to clean. Simply clean them under running water with a mild detergent.

Please also make sure to regularly use a disinfectant.

Take care to only use skinfriendly cleansers and disinfectants and pay attention to all application notes that come with each product.

Please let your toy dry completely before next usage.

In order to prevent any oxidation we recommend to blow dry your Spencer. If that is not possible always ensure to position the toy so that remaining water can run off unhindered.
